Responsible Fatherhood Initiative (RFI) Outreach

A customer’s experience after an RFI Outreach event

“I just wanted to write and thank you once again for the great assistance. It is amazing that I learned and accomplished more in an hour with you then in three years with everyone else. I really appreciate it and wish I had met with you originally. Thanks for the common courtesy, professionalism, and education you provided. Unfortunately not everyone gives those core fundamentals of business. I cannot express how drastic of a change in service I experienced with you rather that the previous times where I was treated unfairly, prejudged, and more. Once again thank you, thank you, thank you.”

Mecklenburg County Child Support Enforcement Customer
Studies show that mother's perceptions greatly influence father's involvement; therefore mothers are a key factor for getting fathers involved. When both parents can effectively co-parent, their children benefit greatly.

Through MAGI, we work with mothers who are child support customers. We use a National Fatherhood Initiative curriculum to explore:

- Mothers’ protective instincts.
- Beliefs about fathers’ involvement in their children’s lives.
- Parents’ impact on children’s well-being.
- Importance of co-parenting.
